THE STONE THAT BURNS; THE STORY OF THE AMERICAN SULPHUR INDUSTRY.

By Williams Haynes

Van Nostrand. 1942.

Review by Dr. F. L. Schneider

Inspector in Charge, Bureau of Animal Industry

THE STONE THAT BURNS comes as a timely expostulation of the production and use of one of our most important non-metallic elements--sulphur. Few, perhaps, until the general subject of sulphur has been reviewed, realize the importance of this element in our everyday way of life. THE STONE THAT BURNS portrays readably and vividly the story of sulphur, an element in nature over which battles have been waged and which is now of critical import in our winning of the present conflict.

BETTER LAWNS, FOR HOMES AND PARKS. Howard B. Sprague. 1940.
